**Topic:** Optimize Jobsite Waste Diversion... Think Outside the Debris Box!

**Date:** Thursday April 3rd, 5:30 - 7:00pm @ 130 Sutter St, S.F.

**Speakers:** Sabrina Foss, Golden Gate and Sunset Scavenge Debris Box Services  
Steve Bicknell, Swinerton Builders  
Harvey Rifkin, Industrial Asset Recyclers

Did you know that your project can earn up to three LEED points for jobsite waste diversion?  
(2 points under MR2 for 75% diversion and 1 point under Innovation and Design for 95% diversion.)

Come learn from three local experts how you can minimize jobsite waste and optimize LEED points on your project. Construction and demolition is estimated to be responsible for up to two thirds of all landfill waste. Effective jobsite waste management can save your project money through avoided landfill tipping fees, facilitate a cleaner, safer and more organized jobsite and it is simply the right thing to do!

## Bios:

**Sabrina Foss**, Golden Gate and Sunset Scavenge Debris Box Services

Sabrina has over ten years experience in waste management. Her company services all commercial jobsites in San Francisco and offers a state-of-the-art waste sorting facility to optimize diversion rates.

**Steve Bicknell**, Superintendent, Swinerton Builders

Steve has twenty three years of experience in the industry and most recently was the superintendent on the LEED certified Orchard Garden Hotel. Jobsite waste diversion is a point of pride for Steve and he is achieving a 90% diversion rate on his current project in downtown San Francisco.

**Harvey Rifkin** Industrial Asset Recyclers

Harvey has over ten years experience in the secondary materials market. IAR targets high-value MEP systems for purchase, salvage and re-use thereby prolonging the useful life of these assets and keeping them out of the landfill.
